

Goodworks Place

129 W Alder St, Missoula MT 59801

“Our vision for **Goodworks Place** is one of gathering, community, collaboration and sharing. We’ve conceptualized it as a “living room” because we want our guests to feel welcome and at home.”

Instruction Manual

For any questions or concerns call Savannah at (208) 946-1292

REMOTES + HDMI CONNECTORS

The remotes are on the fireplace mantle. The black one is for the projector. The white one/orange case is for the Apple TV.

PROJECTOR

To turn on, point the black remote directly at it (it's kind of finicky). The red light indicates it is off. When the light blinks blue, it's turning on. When it is solid blue you should be able to see the screen. The projector takes a while to turn on but you should see a little icon on the bottom right of the screen.

If you have a Mac: turn on the Apple TV by pressing random buttons on the remote (I don't know which, but pressing buttons seems to work!). The projector will need to be on HDMI 1.

If you have anything other than a MAC: there is an HDMI cord hanging from the wall to the right of the fireplace. There are connectors on the mantle. The projector will need to be on HDMI 2.

To switch between HDMI 1 and HDMI 2: there is a small button on the bottom left of the black remote that says HDMI.

SOUND

The speaker needs to be turned on. The switch for the speaker is at the base of the unit next to the plug. When the power light turns blue it is on.

The volume dial is the right-sided dial.

The microphone cord plug-in is the on the left side (it has three prongs).

HAND-HELD MICROPHONE

Needs the orangish cord (both ends with three-prong input) and the microphone. Can be found in the second drawer on the island (under the stovetop).

WIRELESS MICROPHONE

The handheld device (bottom left) is often found in the black bag labeled Shure (top left). Turn on the wireless mic with the switch on the top.

The Shure cord (bottom right) has two ends. The three-prong end goes into the black box (top right). The other end goes into the INPUT plug-in on the speakers.

Microphones and accessories can be found in the second drawer under the stovetop.

SCREEN

The screen might not be pulled down. If you wish to have it pulled down, there is a small wooden pole with a tiny hook that hangs just above where the speaker sits.

LIGHTS

The light switches are to the left of the bathroom.

BATHROOM

Our bathroom is unisex. Please be aware that during the day our employees will also need to use the restroom.

OTHER REMINDERS

- Our stove requires induction cookware: if you wish to use the stove, you can use the ones in the cabinet right of the refrigerator.
- The cabinets and drawers open when you push at the top.
- Our coffee maker is single-serve. Please bring any sugars, creamers, or milks you may need.
- If you use the glass plates and cups, please place them in the dishwasher.
- Feel free to use our industrial ice-maker, microwave, mini-oven, and refrigerator!
- The fireplace can be turned on with the switch on the right side. If it doesn't ignite after a few seconds, flick it off and try again!
- If the weather is bad, feel free to use the shoe rack and go around ins socks! Or just remind people to clean their feet on the rug.

Thank you for choosing Goodworks Place!

We are happy to host you!
